LIMITATIONS: This CLAC360 Origin–Destination Survey Form is a general professional field-recording template. O-D survey methodology, sampling design, zone systems, coding procedures, interview protocols, privacy requirements and analytical methods vary by project and jurisdiction. Adapt the form to the approved survey methodology and project requirements. Unit of observation: one row = one trip/vehicle movement (unless project methodology defines otherwise). Do not invent origin or destination codes. Distinguish observed from reported information. Do not collect unnecessary personal identifiers. This form is not an official government or agency survey instrument.
